

Definition

Info Cubic offers an array of healthcare screenings and vaccinations required for certain candidates and employees, especially those within the healthcare industry. As a premier employment screening company, Info Cubic is truly a one stop shop for all your screening needs.

Availability of services will be dependent upon State and Federal law.

Recommended For

Hospital networks, medical clinics, traveling nurse staffing firms and any other organization with employees who may work at healthcare facilities.

Scope

Info Cubic can partner with you to provide nearly any type of screening or vaccination, in accordance with applicable State and Federal laws and regulations. We partner with all major clinic networks and laboratories to ensure there is always a convenient location near you.

Turnaround Time

1 - 5 Days (turnaround time will vary based on test, vaccination, sample type and initial results)

Process

Candidate will proceed to clinic or doctor's office with their photo ID and either an electronic authorization generated from our site or with a paper form provided to them by your organization. The test will be conducted or the vaccine administered. If a blood screening is being completed, it will be shipped to the lab for testing. If only a vaccine is required, it will be administered.

Results and/or confirmation that the vaccination has been administered will be transmitted to Info Cubic. Final results will be posted to The Cube for review by your organization.

Results Guidelines

Reporting must comply with State and Federal law. Results or confirmation that vaccinations were administered will be reported as received from the clinic, lab or physician. Consultation with qualified legal counsel is recommended for all employment law matters.

Common Screenings:

TB Testing (PPD) – Skin test is completed to see if employee has tuberculosis.

T-Spot TB Test – This is a single clinic visit and is a blood test that is performed.

MMR Titer – Measles, Mumps and Rubella – this is a blood test that measures the antibody levels.

Varicella (Zoster Virus) Titer – This is a blood test that tests to see if employee has been infected with Chickenpox or Shingles or has immunity to the viruses.

Hepatitis A Titer – This is a blood test to determine if employee has immunity to Hepatitis A (contagious liver disease caused by a virus).

Hepatitis B Titer – This is a blood test to determine if employee is immune to Hepatitis B. This is a severe form of viral hepatitis transmitted in infected blood.

Chest X-Ray – Will be completed if employee is Positive for TB or showed positive in the past.
