Definition
The FAA Pilot Accident/Incident Check reports dates and descriptions of any accidents or incidents on record with the Federal Aviation Administration (FAA).

Recommended for
Since 9/11, background checks in the aviation industry have evolved rapidly since they are so important in protecting millions of airline passengers. The aviation industry is heavily regulated by the Federal Aviation Administration (FAA), US Department of Transportation (DOT), and the Transportation Safety Administration (TSA), with each one having different regulations for background screening. Info Cubic has created aviation screening products to help you stay compliant with all federal regulations.

Sources
This search is conducted through the FAA using PRIA form 8060-10.

Turn Around Time
Current turnaround time is up to 20 business days.

Information Required
- Name
- Social Security Number
- Date of Birth
- PRIA form 8060-10 must be provided at the time the order is placed.

Results Guidelines
You should receive from the previous 5 years:
- Medical certificate verification, including issue date, class, and any limitations.
- Airman certificate verification, including level, category, class, and type ratings.
- Summaries of closed FAA legal enforcement actions resulting in a finding by the administrator of a violation that was not subsequently overturned.
- Reports of previous certificate revocation(s) which are reported for an indefinite period of time.
